ADHD RESET PLANNER — A GENTLE, GUILT-FREE PLANNER

Working hyperlinks, energy-based task suggestions, and draggable habit stamps — with **no streaks, no red X, no guilt**. Use it on the days you can. Rest counts too.

● 60-second setup

1. **Unzip** this folder on your iPad (Files app → tap the .zip).
2. Open **GoodNotes** (or Notability / Xodo).
3. **Import** the planner PDF as a **document** (not "as image").
4. Tap the **top navigation bar** — it should jump between pages. That means everything works.

TIP • Pick **one** planner file — **Light** (recommended) or **Dark**. You don't need both. (This is a tip, not a step.)

● How to navigate

- **Top nav bar** (every page): Home · Check-In · Brain Dump · To-Do · Tasks. Tap to jump from anywhere.
- **Energy → tasks**: on Check-In, tap "full Low / High Energy Bank" to get tasks that match today's energy.
- **Energy Bank → Check-In**: from either Energy Bank page, tap "↳ Back to Check-In" to return and note down what you picked.
- **Gentle loop**: the note on Check-In links back to the Mindset page for the hard days.

● Habit stamps

Drag **good-dot.png** / **okay-dot.png** onto a tracker cell — they're already sized to fit. (**good-stamp.png** / **okay-stamp.png** are the larger versions, handy for a bigger stamp elsewhere.) You can also lasso-copy from **sticker-sheet.pdf**. GOOD (green) = did it; it's okay (lavender) = didn't, and that's fine.

Tips & FAQ

● Reusing pages (daily/weekly)

This is a one-of-each template set. To reuse a page, **duplicate** it in your app:

- **GoodNotes:** thumbnail grid (top-left) → ⋮ on a page → Duplicate Page.
- **Notability:** page thumbnails → ⋮ / long-press → Duplicate.
- **Xodo:** page thumbnail panel → long-press → Duplicate.

● GoodNotes: one-tap vs long-press

Need to long-press and tap "Open Link"? That's normal GoodNotes. **Edit mode** (default) needs the long-press; **Read-Only mode** jumps on a single tap — tap the **pencil icon (top-right)** to switch.

● Links still won't jump? Try this

1. **Import as a document, not an image** ("as image" flattens links).
2. **Update your app** (Notability needs v11+ for internal links).
3. **Turn off the pen/eraser first** — switch to the Hand/Pointer tool, then tap the link.
4. **Tap right on the tab/label** — zoom in a little and tap it directly.
5. **Don't "flatten" or "print to PDF"** — it can strip the links.

● Compatibility

App	Hyperlinks	Stickers
GoodNotes 5 / 6	✓ Yes	✓ Drag PNG or lasso-copy
Notability (v11+)	✓ Yes	✓ Lasso-copy from sheet
Xodo (view mode)	✓ Yes	✓ Lasso-copy from sheet

Any PDF app with internal-link support works — the links are standard PDF "go-to page" links, nothing proprietary.

A note on using this

You don't have to use every page, every day. Skip what doesn't help. This is a small guide for getting back up — not another thing to be perfect at. **Rest counts too.**
